## Networking

Is it true "it's not what you know but who" that really matters? Tony Benjamin, a leading networking advisor, points out that the truth is "It's not who you know, but rather who you know, when."

"In the course of my life, I've met a number of famous people -- senators, congressmen, politicians, famous authors, and millionaires just looking to give away money," said Tony. "But most of them aren't part of my network today because I didn't know that it's not who you know, but when you know them that matters. Their influence and personal networks are lost to me because I didn't know then what I know now."

## The Class: Advanced Networking

Most employment training courses charge thousands of dollars and only give you the basics. Sign up for the Advanced Networking Seminar and Tony will teach you his proven techniques for only \$50 (a discount is available if you're unemployed).

The two-hour seminar briefly reviews the same basics that would normally cost you thousands of dollars to learn, but more importantly equips you with an advanced networking skill set. The seminar shows you how to build a network of contacts that will help you find gainful employment, how to know if you're making progress, and how to identify and focus your efforts on those portions of your network that will benefit you the most.
